

Noah was born with a brain malformation from a rare genetic condition and had continual seizures from the minute he was born. At just six weeks old Noah had surgery to remove approximately a quarter of his brain and is now diagnosed with drug resistant epilepsy, cerebral palsy and faces other daily challenges.

From the day Noah was born, we struggled to keep Joseph away from the hospital. He is so protective of him and Noah is also so protective of Joseph in his own little way. In these situations, it is so easy for siblings to get overlooked. Noah was in hospital for three months and we couldn't be at home with Joseph.

Zoe's Place has given Joseph time with us again. There is not jealousy, and he loves coming to Zoe's to pick Noah up. It's given him a focus and helps him understand he is not alone in this journey.
